

155 million years of change in Norfolk in one day at the Forum in
Norwich on Saturday 6th March 2010

Have you ever wondered what stories the earth beneath our feet could tell us?

Have you seen the fossils that lived Norfolk's in chalk seas?

How have people used the rocks they found - ancient flint tools, chalk burnt for lime, and gravel left by the ice made into roads.

How could the information that lies in the rocks tell us more about the climate today?

**Come and find out more at the Forum in Norwich on Saturday 6th
March 2010**

Activities on the day will include:

- Your finds identified, where possible, by experts
- Come and look, touch and examine real fossils
- Your geology questions answered
- Draw a picture using real Norfolk chalk
